

# Case Study : European Bank : Financial & Risk Data Management

## Scope

Bank wanted to expand, at the same time, migrate their Risk Management and Financial Data Management initiative from couple of countries to multiple locations

ODA played a lead role in project management, team building, documenting of the processes, as well as migrating the teams from London and NY to Singapore and India

Team size: 10

Duration: 1year

Locations: London, NY, Singapore and India. Base location was India. However team members moved from India to London & Singapore during knowledge transfer phase as well as project phase as per project requirements

## Methodology

- An initial team of 8 onshore resources was deployed for the project. The onshore team included the project manager and the technical team. Two more resources were added to the team at a later stage.
- For project executions, the technology components used were Business Objects, PL/SQL, Microsoft Excel
- Some of the benefits that the client accrued by making ODA a business partner for this project were reduced risk, lower cost as compared to client's internal resourcing, and reduced risk to go live

### Benefits to client

- Cost Optimization
- Risk Free - Migration
- Fixed price engagement (Shared Risk)

### Added value to client

- Program Management
- Ability to deliver cost-effective solutions with high quality
- A reputation for adherence to strict deadlines.
